MOBILE MUSIC: APPS FOR IPHONE

Scott LaVine, Presenter

August 9, 2010

Application Types

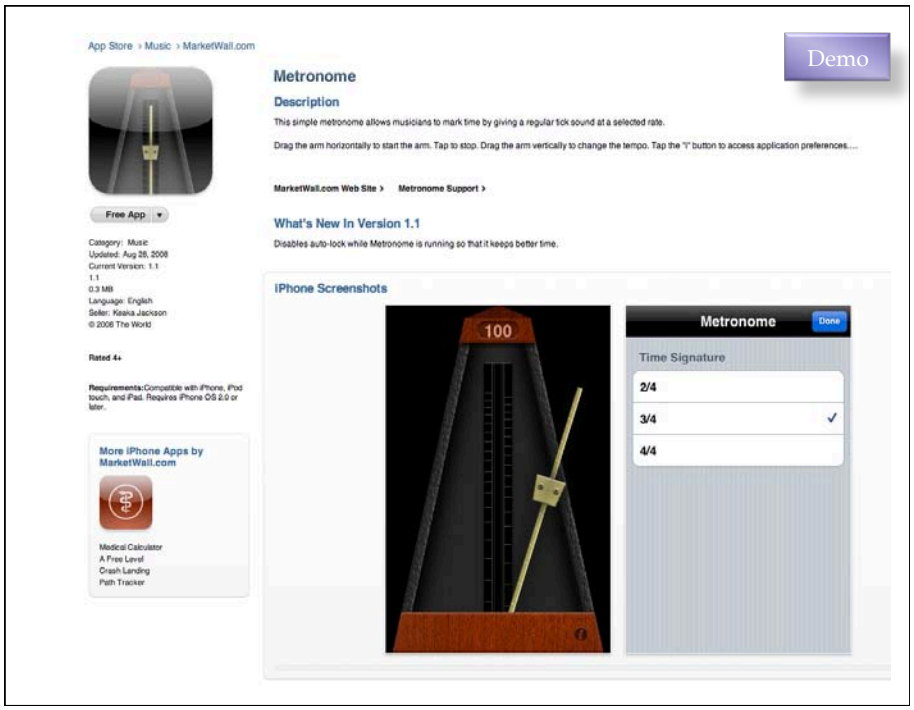
- Utility programs: Metronomes, tuners, sound meters
- Productivity: classroom data management
- Instruments: Pianos, guitars, synths, "wind" instruments
- Ear training, theory, note reading
- References: Dictionaries
- Creative applications: Music production, recorders, notation

Compatibility

- All apps are compatible with iPhone and iPad
- Most apps are compatible with iPod Touch except those requiring microphone input
- Many apps are being retooled to take advantage the iPad screen and processor
- A few apps have being ported over to other phones such as the Verizon Droid line.
- Visit the websites of each app to see about platform availability

UTILITY PROGRAMS

Metronomes



Demo
App Store › Music › MarketWall.com
Metronome
Description
This simple metronome allows musicians to mark time by giving a regular tick sound at a selected rate.
Drag the arm horizontally to start the arm. Tap to stop. Drag the arm vertically to change the tempo. Tap the "i" button to access application preferences....

Metronome-iTick
Description
This is a simple digital metronome with time signatures, Italian tempo markings, and BPMs, and allows you to locate your desired tempo quickly.
I play a bit of guitar, and need a handy metronome from time to time. There are a couple of Metronome apps out in iTune, and surprisingly none of them is free....

Tuna Pitch chromatic tuner
Description
Stay in tune with this chromatic tuner and pitch pipe for your musical instrument. It tunes not only with guitars, bass guitars, and banjos, but also many other instruments and even with your voice. (Just sing into it!) The tuner works with the built-in microphone on the iPhone, and with any audio that comes in from an external source, such as the microphone on a headset, on the iPhone and iPod touch second generation. The built-in pitch pipe lets you play a reference tone for tuning by ear. ...

pianissimo, pp
Language Italian
Very gently. Perform very softly, even softer than piano. This convention can be extended - the more ps that are written, the softer the composer wants the musician to play or sing, thus ppp (pianississimo) would be softer than pp. Dynamics in a piece should be interpreted relative to the other dynamics in the same piece. For example, pp should be executed as softly as possible, but if ppp is found later in the piece, pp should be markedly louder than ppp. More than three ps (ppp) or three fs (fff) are uncommon.

Opera Terms
Opera is an art form in which singers and musicians perform a dramatic work combining text and musical score. Opera is part of the Western classical music tradition. Opera incorporates many of the elements of spoken theatre, such as acting, scenery and costumes and sometimes includes dance. The performance is typically given in an opera house, accompanied by an orchestra or smaller musical ensemble. Opera started in Italy at the end of the 16th century and soon spread through the rest of Europe: Schütz in Germany, Lully in France, and Purcell in England all helped to

Mozart's Dice Game
Description
This application is based on a musical dice game, or "Musikalisches Würfelspiel", attributed to composer Wolfgang Amadeus Mozart, published in 1792, one year after the composer's death. The game lets you create a musical piece, consisting of a minuet and trio, out of 272 different musical measures. The minuet and trio are each 16 measures long and for each measure there are 11 (for the minuet) and 6 (for the trio) different outcomes. The outcome is determined by dice-rolling. ...

INFORMATION
A musical dice game, or Musikalisches Würfelspiel, attributed to composer Wolfgang Amadeus Mozart, was published in 1792, one year after the composer's death. Although we don't know for sure that this game really was constructed by Mozart, we do know that the composer enjoyed games of this type, and constructed other, similar, games.
The game lets you create a minuet and trio out of 272 different musical measures. The minuet and trio are each 16 measures long and for each measure there are 11 (for the minuet) and 6 (for the trio) different outcomes. The outcome is determined by dice-rolling.
The idea is to roll two six-sided dice for each measure in the minuet, adding the numbers on the dice together, and using the resulting number to select a measure from a table. The same goes for the trio, but here you only roll one
